Title: Workshop on Advances in 3- D Printing Technology

Introduction to the Event: comprehensive session designed to explore the latest innovations, applications, and advancements in the realm of 3-D printing. This workshop will provide participants with an in-depth understanding of the capabilities of 3-D printing technology and its transformative impact across industries, from manufacturing and healthcare to aerospace and education.

As 3-D printing technology evolves, it enables unprecedented levels of customization, speed, and precision in product design and production. Participants will gain hands-on experience, practical insights, and knowledge from experts in the field, exploring cutting-edge developments such as multi-material printing, bio-printing, and advancements in additive manufacturing.

Through this workshop, we aim to empower professionals, educators, students, and enthusiasts to harness the power of 3-D printing technology, unlocking new potentials in innovation, prototyping, and sustainable manufacturing solutions.

Title: FDP on "Potentiality in to Performance"

Introduction to the Event: The Faculty Development Program (FDP) titled "Potentiality into Performance" was successfully organized with the aim of empowering faculty members to harness their potential and translate it into enhanced teaching and professional performance. The program focused on identifying individual strengths, developing effective teaching strategies, and fostering a growth mindset within the academic environment.

The primary objectives of the FDP were to:

- ❖ Equip faculty members with tools and techniques for personal and professional development.
- ❖ Enhance teaching methodologies to foster student engagement and learning.
- ❖ Promote a culture of continuous improvement and innovation in teaching.
- ❖ Encourage self-awareness and resilience as key factors in professional success.

Title: Workshop on “Conventional Machine Tools”

Introduction to the Event: The Workshop on Conventional Machine Tools was conducted with the objective of enhancing participants' understanding and practical skills in the operation and maintenance of conventional machinery. Conventional machine tools, despite the rise of CNC and automated machinery, remain foundational in manufacturing and are essential for various applications in mechanical engineering and other fields. This workshop aimed to bridge the knowledge gap and provide hands-on experience with tools that are fundamental to the industry.

The key objectives of the workshop were to:

- Introduce participants to different types of conventional machine tools, such as lathes, milling machines, drilling machines, and grinders.
- Provide hands-on training in machine tool operation, safety measures, and maintenance.
- Enhance the practical skills and understanding of participants regarding machining processes.
- Encourage the proper handling and care of equipment to ensure efficient and safe machine operation.

**A Five Day Workshop on Maintenance of
Electrified Traction system**

Date: 6th Oct – 10th Oct, 2016

Coordinator

Dr.D.Godwin
Prof., Dept. of EEE

Co-Coordiators

Mr.P. Ranjith Krishna
Asst.Prof., Dept. of EEE

Mr.P Rajesh Kumar
Assistant Prof., Dept. of EEE

**Organized
by**

**Department of Electrical and Electronics
Engineering**

**BHARAT INSTITUTE OF ENGINEERING AND
TECHNOLOGY**
Hyderabad, Telangana, India

BHARAT INSTITUTE OF ENGINEERING AND TECHNOLOGY

Title: Workshop on “Maintenance of Electrified Traction Systems”

Introduction to the Event: The Workshop on “Maintenance of Electrified Traction Systems” was held with the aim of educating participants on the critical practices, challenges, and safety protocols involved in maintaining electrified traction systems. As these systems are essential for railway transportation, ensuring their efficient and uninterrupted operation is vital. This workshop brought together professionals, students, and faculty to deepen their knowledge and practical skills in traction system maintenance.

The primary objectives of the workshop were to:

- Provide a comprehensive understanding of electrified traction systems and their components.
- Offer practical insights and hands-on training in the maintenance and troubleshooting of traction equipment.
- Emphasize the importance of safety practices when working with high-voltage traction systems.
- Equip participants with strategies for preventive and predictive maintenance to minimize system failures.

Title: FDP on “Interactive Teaching Methodologies of Programming Languages”

Introduction to the Event: The Workshop on Interactive Teaching Methodologies of Programming Languages was conducted to enhance educators' skills in teaching programming in engaging and effective ways. With programming languages forming a fundamental component of computer science education, the workshop aimed to equip educators with interactive methodologies and tools to improve student understanding and engagement in programming courses.

The main objectives of the workshop were to:

- Introduce interactive and student-centered teaching methodologies for programming languages.
- Demonstrate the use of digital tools and platforms that facilitate collaborative and hands-on learning.
- Provide strategies for overcoming common challenges in teaching complex programming concepts.

Title: FDP on “CNC Machines and Machining Centres”

Introduction to the Event: The FDP on CNC Machines and Machining Centres was conducted to provide participants with foundational and advanced knowledge in Computer Numerical Control (CNC) technology and its applications in modern machining. As CNC machines and machining centres are integral to precision manufacturing, this workshop aimed to educate participants on their operational principles, programming techniques, and maintenance requirements to enhance productivity and accuracy in manufacturing processes.

The key objectives of the FDP were to:

- Introduce the fundamentals of CNC machines and machining centres, including their functions and applications.
- Provide hands-on training in CNC programming and machine operation.
- Emphasize the importance of precision, safety, and troubleshooting in CNC operations.

Title: FDP on “CNC Machines and Machining Centres”

Introduction to the Event: The FDP on CNC Machines and Machining Centres was conducted to provide participants with foundational and advanced knowledge in Computer Numerical Control (CNC) technology and its applications in modern machining. As CNC machines and machining centres are integral to precision manufacturing, this workshop aimed to educate participants on their operational principles, programming techniques, and maintenance requirements to enhance productivity and accuracy in manufacturing processes.

The key objectives of the FDP were to:

- Introduce the fundamentals of CNC machines and machining centres, including their functions and applications.
- Provide hands-on training in CNC programming and machine operation.
- Emphasize the importance of precision, safety, and troubleshooting in CNC operations.

Event Date: 06.09.2016 to 10.09.2016

Title: Workshop on "Antenna Measurements"

Introduction to the Event: The Workshop on Antenna Measurements was held at BIET, aimed at providing a thorough understanding of antenna measurement techniques to participants. Accurate antenna measurements are essential in antenna design, testing, and implementation across fields such as telecommunications, aerospace, and radar technology. This workshop introduced participants to the theory and practice of antenna measurements, emphasizing hands-on sessions with specialized equipment for enhanced learning.

The main objectives of the workshop were:

- To introduce the fundamentals and principles of antenna measurements.
- To provide hands-on experience with measuring key antenna parameters such as gain, impedance, and radiation pattern.

Event Date: 08.08.2016 to 12.08.2016

Title: FDP on “Design of Press Tools”

Introduction to the Event: The Faculty Development Program (FDP) on the **Design of Press Tools** was held at BIET, aimed at enhancing the technical expertise of faculty members in the specialized area of press tool design. Press tools are essential in manufacturing processes where metal forming, punching, and shaping play significant roles. This FDP provided insights into press tool design methodologies, material selection, and practical application in industrial manufacturing, equipping faculty with skills to impart advanced knowledge to students in related fields.

The key objectives of the FDP were to:

- Provide comprehensive knowledge on the types and applications of press tools in metalworking.
- Familiarize faculty with design techniques, material selection, and practical considerations in press tool design.

Title: Workshop on “Maintenance of Biogas Plant”

Introduction to the Event: The Workshop on **Maintenance of Biogas Plant** was conducted to educate participants on the best practices and technical skills needed for the maintenance and operation of biogas plants. Biogas plants play a crucial role in sustainable waste management and renewable energy production. This workshop aimed to equip participants with practical knowledge and techniques to ensure efficient plant operations, minimize downtime, and maximize gas output.

The primary objectives of the workshop were to:

- Provide an understanding of biogas plant operation and maintenance.
- Train participants in preventive maintenance techniques to avoid common operational issues.
- Discuss troubleshooting strategies and safety protocols in biogas plant maintenance.

Title: Workshop on “ **MIND, ENGINEERING& SELF CONFIDENCE**”

Introduction to the Event: The Workshop on **Mind, Engineering & Self-Confidence** was conducted on to help participants cultivate self-confidence, mental clarity, and an empowered mindset for academic and professional success. Recognizing that personal growth and technical skills must go hand in hand, this workshop explored strategies to enhance self-confidence and mental resilience, offering tools to navigate the demands of engineering studies and careers with clarity and self-assurance.

The main objectives of the workshop were to:

- Foster self-confidence, a growth mindset, and mental resilience among participants.
- Explore the intersection of engineering problem-solving with personal development strategies.

Title: Workshop on “IoT bases MSP 430”

Introduction to the Event: The Workshop on **IoT-Based MSP430** was held at BIET to provide participants with insights into the Internet of Things (IoT) and the practical implementation of IoT applications using the MSP430 microcontroller. As IoT technology continues to evolve and permeate various industries, understanding its integration with microcontrollers is essential for students and professionals in engineering fields. This workshop aimed to equip participants with the skills necessary to design, develop, and deploy IoT solutions using the MSP430 platform.

The primary objectives of the workshop were to:

- Introduce participants to the concepts of IoT and its relevance in modern technology.
- Familiarize participants with the MSP430 microcontroller and its features.

Title: FDP on “Be bold for the change”

Introduction to the Event: The Faculty Development Program (FDP) titled “**Be Bold for the Change**” was conducted to inspire and equip faculty members with the mindset and tools necessary to embrace change in their professional and personal lives. Recognizing the rapid pace of transformation in education and society, this program aimed to encourage educators to adopt innovative teaching practices, foster a growth mindset, and lead with confidence.

The primary objectives of the FDP were to:

- Empower faculty members to embrace change and innovation in their teaching methodologies.
- Promote a growth mindset that encourages continuous learning and adaptability

Title: FDP on “Workshop on Skills and Tips in Programming Domain”

Introduction to the Event: The Workshop on **Skills and Tips in the Programming Domain** was conducted to enhance the programming skills of students and professionals. In today's technology-driven world, strong programming skills are essential for success in various fields, including software development, data analysis, and artificial intelligence. This workshop aimed to provide participants with practical skills, best practices, and valuable tips to improve their programming proficiency and confidence.

The primary objectives of the workshop were to:

- Introduce participants to key programming concepts and languages relevant to the current industry landscape.
- Provide practical skills and techniques for effective coding and problem-solving.

Title: Workshop on “MAT Lab Programming In Advanced Learners”

Introduction to the Event: The Workshop on **MATLAB Programming for Advanced Learners** was held with the aim of enhancing participants' proficiency in MATLAB programming, a crucial tool in engineering and scientific research. Recognizing the importance of advanced computational skills in various fields, this workshop provided participants with in-depth knowledge and hands-on experience in utilizing MATLAB for complex problem-solving and data analysis.

The primary objectives of the workshop were to:

- Equip participants with advanced MATLAB programming skills for technical applications.
- Explore MATLAB's powerful toolboxes and features relevant to engineering and research.

Event Date: 23.03.2017 to 27.03.2017

No. of Participants: 47

No. of Days: 05

Resource Person: Dr. D Shankar Reddy

Title: FDP on “**AUTO CAD**”

Introduction to the Event: The Faculty Development Program (FDP) on **AutoCAD** was conducted to enhance the technical skills of faculty members in using AutoCAD, a crucial tool in design and drafting across various engineering and architectural disciplines. This program aimed to provide educators with the knowledge and skills needed to effectively teach AutoCAD, ensuring that students receive up-to-date training in this essential software.

The primary objectives of the FDP were to:

- Familiarize faculty members with the latest features and functionalities of AutoCAD.
- Enhance the teaching methodologies related to CAD software.
- Provide hands-on experience in creating and modifying designs using AutoCAD.

Title: FDP on "A Method of Assessment of working condition of Turbo Generators"

Introduction to the Event: Turbo generators are critical components in power generation, converting mechanical energy into electrical energy. Assessing their working conditions is essential to ensure efficiency, reliability, and safety in power plants. This report outlines the findings and methodologies discussed during the workshop titled "A Method of Assessment of Working Conditions of Turbo Generators," held at BIET.

The primary objectives of the workshop were to:

- Explore various methods for assessing the working conditions of turbo generators.
- Identify key performance indicators (KPIs) relevant to the efficiency and reliability of turbo generators.

Title: FDP on “**Embedded Systems**”

Introduction to the Event: The Faculty Development Program (FDP) on **Embedded Systems** was conducted to enhance the knowledge and skills of faculty members in the design and development of embedded systems. As embedded systems are integral to various applications ranging from consumer electronics to industrial automation, this program aimed to equip educators with the latest trends and methodologies in this rapidly evolving field.

The primary objectives of the FDP were to:

- Provide participants with a comprehensive understanding of embedded systems and their applications.
- Introduce various development tools and methodologies used in embedded system design.

Event Date: 19.01.2017 to 23.01.2017

Title: FDP on “Remote Sensing and Geographical Information System”

Introduction to the Event: The Faculty Development Program (FDP) on **Remote Sensing and Geographical Information System (GIS)** was held to enhance the expertise of faculty members in these critical geospatial technologies. Remote sensing and GIS have become essential tools in a wide array of fields, including environmental science, urban planning, disaster management, and resource mapping. This FDP aimed to provide a strong foundation in the fundamentals of remote sensing and GIS, along with hands-on experience with relevant software tools and applications.

Objectives

The primary objectives of the FDP were to:

- Introduce participants to the fundamental concepts and techniques of remote sensing and GIS.
- Develop proficiency in using GIS software for spatial data analysis and interpretation.

Title: FDP on “FPGA in Signal Processing”

Introduction to the Event: The Faculty Development Program (FDP) on **Field Programmable Gate Array (FPGA) in Signal Processing** was conducted to enhance the skills of faculty members in applying FPGA technology to signal processing tasks. FPGAs are becoming increasingly valuable in areas such as digital signal processing (DSP) due to their flexibility, high speed, and parallel processing capabilities. This FDP aimed to familiarize educators with the design and implementation of FPGA-based systems for various signal processing applications, providing hands-on experience with FPGA tools and methodologies.

Objectives

The primary objectives of the FDP were to:

- Introduce participants to FPGA technology and its significance in real-time signal processing.
- Teach FPGA design fundamentals, including architecture, programming languages, and tools.
